NILANJANA DAS JUI

Mern Stack Developer
Chawkbazar, Chittagong, Bangladesh | +880 1794437893
nilanjana.csecu@gmail.com | LinkedIn | GitHub | Portfolio

CAREER OBJECTIVE

A passionate Computer Science student and MERN Stack Developer with hands-on experience building full-stack web applications using Next.js, React, Node.js, Express.js, and MongoDB. Eager to contribute to real-world development teams, deliver user-focused digital solutions, and grow into a well-rounded professional software engineer.

SKILLS

Languages: JavaScript (ES6+), Java, Python, C++, R, HTML5, CSS3

Backend & Database: Node.js, Express.js, REST APIs, MongoDB, MongoDB Atlas, Mongoose, Oracle SQL

Frontend: React.js, Next.js 16 (App Router), Vite, Tailwind CSS v4, Framer Motion, HeroUI, Context API, Recharts

Auth, Payments & Tools: BetterAuth, Google OAuth, JWT, HTTPOnly Cookies, Stripe, Git, GitHub, Vercel, Render, Axios

Interpersonal: Problem-solving, Self-directed learning, Attention to detail, Teamwork, Technical communication

PROJECTS

RescueLink *Disaster Relief Coordination Platform*

Next.js 15, Express.js, TypeScript, MongoDB, Better Auth, Groq AI, Tailwind CSS | Live Site | Client Repo | Server Repo

- Built a role-based Express.js/TypeScript REST API (User, Admin, Tenant) with JWT verification middleware and MongoDB/Mongoose data models spanning **23 endpoints** across missions, volunteer signups, and field updates
- Implemented an AI recommendation engine using Groq AI (llama-3.3-70b-versatile) to score volunteer-mission fit and generate match reasons, combined with Adzuna API listings and a heuristic fallback for resilience.
- Developed mission discovery with debounced search, multi-filter sorting, and grid/map views across **17 pages**, plus a live recruitment progress bar and field-updates timeline on mission detail pages

UrbanNest *Rental & Booking Marketplace*

Next.js 15, React 19, Tailwind CSS v4, Better Auth, Stripe, MongoDB, Framer Motion | Live Site | Client Repo | Server Repo

- Built email/password and Google OAuth authentication with Better Auth, JWT-secured APIs, and role-based access control across **3 dashboards** (Tenant, Owner, Admin)
- Implemented server-side search, filter, and sort across live property listings, with an end-to-end booking workflow (request $\rightarrow$ approval $\rightarrow$ move-in scheduling) and full booking history tracking
- Integrated Stripe Payment Intents with server-side payment verification, and built an owner revenue-analytics dashboard powered by MongoDB aggregation pipelines.

DriveFleet *Premium Car Rental Platform*

Next.js 16, Tailwind CSS v4, Express.js, MongoDB, BetterAuth, Axios, Framer Motion | Live Site | Client Repo | Server Repo

- Built car search, filtering by category, and sorting by price, newest, or popularity, plus an owner dashboard to list, edit, or delete vehicles (type, daily price, seats, location, images)
- Built a booking system with optional driver assignment and special notes, managed via a personal dashboard with tab filters (Active, Pending, Cancelled)
- Implemented one-click cancellation with confirmation and re-booking of cancelled cars, reducing repeat-booking friction

EDUCATION

Bachelor of Science in Computer Science and Engineering Expected: 2027

University of Chittagong, Chittagong, Bangladesh

6th Semester

Relevant Coursework: Operating Systems, Computer Architecture, Software Engineering, Data Communications and Networking.

LANGUAGE

Bengali: Native | **English:** Fluent (Reading, Writing, Speaking)
