

NILANJANA DAS JUI

MERN Stack Developer

Chittagong, Bangladesh | +880 1794437893 |

nilanjana.csecu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

A passionate Computer Science student and MERN Stack Developer with hands-on experience building full-stack web applications using Next.js, React, Node.js, Express.js, and MongoDB. Eager to contribute to real-world development teams, deliver user-focused digital solutions, and grow into a well-rounded professional software engineer.

SKILLS

Languages: JavaScript (ES6+), Java, Python, C++, R, HTML5, CSS3

Frontend: React.js, Next.js 16 (App Router), Vite, Tailwind CSS v4, Framer Motion, HeroUI, Context API, Recharts

Backend & Database: Node.js, Express.js, MongoDB, MongoDB Atlas, Oracle SQL

Auth & Tools: BetterAuth, Google OAuth, HTTPOnly Cookies, Git, GitHub, Vercel, Render, Axios, REST APIs

Interpersonal: Problem-solving, Self-directed learning, Attention to detail, Teamwork, Technical communication

PROJECTS

UrbanNest – Full-Stack Property Rental & Booking Marketplace

Next.js 15, React 19, Tailwind CSS v4, Better Auth, Stripe, MongoDB, Framer Motion | [Live Site](#) | [Client Repo](#) | [Server Repo](#)

A production-grade rental platform connecting property owners and tenants with a three-role marketplace (Tenant, Owner, Admin), a real booking lifecycle, and Stripe-powered payments.

- Built email/password and Google OAuth authentication with Better Auth, JWT-secured APIs, and role-based access control across Tenant, Owner, and Admin dashboards
- Implemented server-side search, filter, and sort across live property listings, along with an end-to-end booking workflow (request → approval → move-in scheduling) with full booking history tracking
- Integrated Stripe Payment Intents with server-side payment verification, and built an owner dashboard with revenue analytics powered by MongoDB aggregation pipelines

DriveFleet – Premium Car Rental Platform

Next.js 16, Tailwind CSS v4, Express.js, MongoDB, BetterAuth, Axios, Framer Motion | [Live Site](#) | [Client Repo](#) | [Server Repo](#)

A full-stack premium car rental platform where users can explore, list, book, and manage vehicles – all in one place with secure authentication and a smart booking system.

- Users can search cars by name, filter by category, and sort by price, newest, or popularity to find the perfect rental
- Car owners can list their vehicles with full details (type, daily price, seats, location, images), and edit or delete listings anytime from their dashboard
- Authenticated users can book any available car with optional driver assignment and special notes; manage all bookings via a personal dashboard with tab filters (Active, Pending, Cancelled), cancel with confirmation, and re-book cancelled cars in one click

Database Design Studio – DB Normalization & ER Diagram Tool

React, Flask, Pandas, Graphviz, Context API, Axios | [Live Site](#) | [GitHub repo](#)

A full-stack application that automates database normalization (1NF–3NF), functional dependency detection, and ER diagram generation with an interactive workflow UI.

- Accepts CSV/Excel uploads, detects functional dependencies, and decomposes schemas into 1NF, 2NF, and 3NF with candidate/primary key identification, lossless join checks, and dependency preservation verification
- Generates styled ER diagrams (Graphviz) with PK/FK detection and provides an Excel-like table viewer for browsing normalized output
- Features a draggable workflow panel, live code panel showing executed backend logic, and a message log with interactive table navigation dropdowns

EDUCATION

Bachelor of Science in Computer Science and Engineering

Expected: 2027

University of Chittagong, Chittagong, Bangladesh

6th Semester

Relevant Coursework: Operating Systems, Computer Architecture, Software Engineering, Data Communications and Networking, Computer Networking, Ethics and Professional Issues in Computing

LANGUAGE

Bengali Native

English Fluent (Reading, Writing, Speaking)
